PRE-CONGRESS WORKSHOP 2

ADVANCES IN PRESERVATION OF BREAST COSMESIS: BREAST IMAGING BASICS TOWARDS SCARLESS LUMPECTOMY FOR BENIGN CONDITIONS

**Organised by Breast Chapter College of Surgeons, Academy of Medicine of Malaysia
Supported by College of Radiology**

Date : 17th May 2017 (Wednesday)

(Limited to 50 participants only)

Time : 0730 - 1600 hrs

Venue : Dewan Auditorium, Level 13th & Level 2, Menara Selatan, University Malaya Medical Centre, Kuala Lumpur, Malaysia

Aim of Course : In benign conditions, scarless surgery provides a less invasive approach to diagnosis and treatment. A systematic approach from principles, patient selection, treatment planning and techniques will be presented. Basic of breast imaging will be covered.

Target Participants : General Surgery Medical Officers with Breast Interest, Breast Surgery Fellows, Specialist Breast Surgeons, Radiology Trainees, Radiologists, Breast Care Nurses

Educational Methods : Lectures, Case-Based Discussions and Treatment Planning, Live Surgery, Dry Lab

PROGRAMME

0730 - 0830 Registration & Breakfast

0830 - 0900 Scarless Surgery in Benign Breast Conditions - Patient Selection
Tan Yah Yuen

0900 - 0920 Fundamentals of Breast Ultrasound
Anusya Vijayanathan

0920 - 0940 Ultrasound Guided Biopsies - Back to Basics
Anusya Vijayanathan

0940 - 0950 Case Work Up
Kiran Kaur Amer Singh

0950 - 1020 Live Surgery
(Free Flow Refreshments)
Tan Yah Yuen

1020 - 1040 Benign and Malignant Disease on Ultrasound

Panelists: Tan Yah Yuen, Anusya Vijayanathan, See Mee Hoong, Kartini Rahmat

PRE-CONGRESS WORKSHOP 3

SCIENCE OF TISSUE MANAGEMENT

Date : 17th May 2017 (Wednesday)

Time : 0900 - 1745 hrs

SoTM : “HOW DO WE CONNECT THE NEEDS OF TISSUE, TO THE SKILLS OF THE SURGEON, TO THE BENEFITS OF THE PATIENT”

This workshop is targeted to surgical trainees and medical students and provides a platform with hands-on opportunity where sound understanding and in-depth knowledge on device-tissue interaction and Science of Tissue Management (SoTM) can be obtained. It would involve sharing the latest information and innovations in Stapling, Energy Devices, Abdominal Wound Closure and Intra-operative Bleeding Management and will be divided into a morning lecture session and an afternoon hands-on lab session.

LECTURE

Venue : Clinical Auditorium, Faculty of Medicine, University Malaya Medical Centre, Kuala Lumpur, Malaysia

0900 - 0930	Registration & Breakfast
0930 - 0940	Welcome Address
0940 - 0950	Introduction to Science of Tissue Management (SoTM); Overview and History
0950 - 1050	SoTM ENERGY
1050 - 1100	Tea
1100 - 1130	Lab Demonstration; Electricity Q & A
1130 - 1230	SoTM Stapling
1230 - 1300	SoTM Bleeding Management
1300 - 1330	SoTM Abdominal Wall Closure
1330	Lunch End of Lecture Session

PRE-CONGRESS WORKSHOP 3

HANDS-ON & LAB DEMONSTRATION

Venue : Clinical Skills Unit, Faculty of Medicine, University Malaya Medical Centre, Kuala Lumpur, Malaysia

- 1430 - 1630 **Lab Stations:**
1. ENERGY; Ultrasound and Bipolar
 2. Open Stapling; NTLC and CDH
 3. Endo Stapling; GST and Powered Echelon
 4. Bleeding Management; Fibrillar and SNoW (deployment method)
 5. Abdominal Wound Closure; Loop PDS, Single strand PDS with self-locking knot and Stratafix
- 1630 - 1645 Tea
- 1645 - 1745 Lab Demonstration Continues
- 1745 Closing & Group Photo
 End of Lab Demo Session

PRE-CONGRESS WORKSHOP 4

VASCULAR UPDATE

Date : 17th May 2017 (Wednesday)

Time : 0800 - 1400 hrs

Venue : Advanced Surgical Skills Centre, Universiti Kebangsaan Malaysia Medical Centre, Kuala Lumpur, Malaysia

Organising Chairman : Hanafiah Harunarashid

Co-Chairman : Mohamad Azim Md Idris / Lenny Suryani Safri

Secretary : Shazana Shahari / Mohd Amirullah Shah

This pre-congress workshop aims to provide surgical trainees with an understanding of the principles and the recent advances of vascular diseases, investigation and management approaches and latest surgical techniques including the subjects of post operative management and complications.

It is very suitable for vascular and general surgical trainees, medical officers, house officers, senior medical students and vascular health workers.

PROGRAMME

- 0800-0830 Registration & Welcome Address
- 0830-0900 Management of Chronic Venous Insufficiency
Hanafiah Harunarashid
- 0900-0930 Controversies in Vascular Access Surgery
Chew Loon Guan
- 0930-1000 How do I do it? Vein Mapping in Vascular Access
Mohamad Azim Md Idris
- 1000-1030 Common Mistakes in Vascular Assessment
Hanif Hussein
- 1030-1100 Tea Symposium
- 1100-1130 How do I Start My Revision for Vascular Exams?
Ahmad Rafizi Hariz Ramli
- 1130-1200 Recent Advances in Vascular Research
Reza Mofidi
- 1200-1230 Tricks & Tips - Femoral Embolectomy
Naresh Govindarajanthran
- 1230-1300 Avoiding Complications in Managing Limb Ischaemia
Zainal Ariffin Azizi
- 1300-1330 What is Latest on EVAR Technology?
Andrew Choong
- 1330-1400 Lunch Symposium & Closing Ceremony

PRE-CONGRESS WORKSHOP 5

ADVANCED LAPAROSCOPIC SUTURING WORKSHOP

Date : 17th May 2017 (Wednesday)

(Limited to 16 participants only)

Time : 0800 - 1630 hrs

Venue : Dewan Pesona, Sarawak General Hospital, Kuching, Sarawak, Malaysia

Participants : Surgeons, Master Students, Medical Officers

INTRODUCTION

In this day and age, advances in technology has revolutionized healthcare and changed the way we perform surgery. Laparoscopic surgery has become the gold standard for many operative procedures over the last 2 decades. Laparoscopic suturing is technically challenging but an important skill to acquire for surgical trainees as well as established surgeons. The use of endotrainer box with the supervision from experts will facilitate acquisition of such skills.

This one day intensive workshop is directed to help participants to progress from basic handling skills to advanced laparoscopic suturing. It is delivered by established laparoscopic surgeon in their own field with lectures and hands on laparoscopic suturing (both dry and wet models) using endo-trainer.

OBJECTIVES

1. To understand the principles of laparoscopic suturing.
2. To be familiar with the technique of laparoscopic intra-corporeal and extra-corporeal knotting.
3. To be familiar with the technique of laparoscopic tissue handling.

BENEFITS OF ATTENDING

1. Hands on practical demonstration
2. Small group teaching
3. Video and live demonstrations of suturing/knotting.
4. High trainer-delegate ratio

PRE-CONGRESS WORKSHOP 5

PROGRAMME

- 0800 - 0830 Registration
- 0830 - 0845 Welcome Address & Programme Overview
- 0845 - 0900 Session 1: Requirement of Laparoscopic Suturing
- Port Placement/Ergonomics
- Needle Holder Types
- Knot Pusher
- Ideal Suture Length
- 0900 - 0940 Video/Live Demo:
- Needle Introduction, Handling, Loading
- Loading Through Tissue, Extraction
- 0940 - 1000 Tea
- 1000 - 1020 Session 2: Intra-Corporeal and Extra-Corporeal Knotting
- 1020 - 1050 Live Demo/Video: Method of Knotting
- 1050 - 1230 Practical/Hands-On
- 1230 - 1330 Lunch
- 1330 - 1350 Session 3: Laparoscopic Suturing in GI Surgeries
- 1350 - 1420 Live demo/ Video: Laparoscopic Suturing (Interrupted, Continuous)
- 1420 - 1530 Practical/Hands-On
- 1530 - 1620 Assessment: Laparoscopic Suturing and Knotting
- 1620 - 1630 Q & A
Feedback and Workshop Closure

PRE-CONGRESS WORKSHOP 6

ADVANCED LAPAROSCOPIC LIVE SURGERY

Date : 18th May 2017 (Thursday)

Time : 0800 - 1700 hrs

Venue : Main Operating Theatre & Auditorium, Sarawak General Hospital, Kuching, Sarawak, Malaysia

Aim of Course : With the advancement in medical technologies, we are now progressing from conventional open (laparotomy) to minimally invasive surgeries (MIS) with various techniques and modifications; differ between surgeons, hospitals and countries. This workshop will explore various techniques of MIS in Upper Gastrointestinal, Bariatric, Hepatobiliary, Colorectal and Hernia surgery from experts in their field worldwide. It is hope that with this exposure, surgeons will be able to learn and perform the procedures safely. Through this workshop, it is also hoped that it will raise interest and awareness of MIS among medical officers and master students.

Target Participants : General Surgeons especially those interested in Minimally Invasive Surgery and those who wish to subspecialize in the field of interest, Upper Gastrointestinal Surgeons & Trainees, Hepatobiliary Surgeons & Trainees, Colorectal Surgeons & trainees, Bariatrics Surgeons and Trainees, Master Students of Master of Surgery and Medical Officers who have interest in surgery and minimally invasive procedures.

Educational Methods : Lectures. Live Surgery. Case Discussion during Live Surgery

Highlights of the Programme : Laparoscopic Liver resection, Laparoscopic cholecystectomy using indocyanine green, Laparoscopic anterior resection, Laparoscopic bariatric surgery using deep neuromuscular block, Laparoscopic fundoplication, Laparoscopic totally extraperitoneal hernioplasty & Laparoscopic intraperitoneal onlay mesh.

Time : 0730 - 1900 hrs

Venue : Clinical Skill Laboratory, University of Malaya, Kuala Lumpur, Malaysia

Director : April Roslani

Co-Director : Ng Char Hong

This two-day course is designed to advance the practical, theoretical and personal skills necessary for the care of critically ill surgical patients. The course is suitable for candidates who are now undergoing their surgical training (Master of Surgery) or just obtained their Master of Surgery. If you are in the earlier part of surgical training you must submit a CV with your application.

CONTENT

This course is designed to advance the practical, theoretical and personal skills necessary for the care of critically ill surgical patients. It is aimed at surgeons and those dealing with surgical patients who are in specialist training.

LEVEL

Master of Surgery Students and Specialists

It is the responsibility of the course delegates to ensure that they fall within the relevant criteria for the course as detailed above. If we discover that your experience is below the required level before or at any time during the course, the College reserves the right to refuse you from continuing to attend the course without compensation.

WHAT DOES THE COURSE ENTAIL?

- Theoretical knowledge (respiratory failure, cardiac disorders, renal dysfunction, pain, the multiply injured patient, communication skills, conducting a surgical ward round)
- Practical skills stations (airway management, tracheostomy, wound assessment, stoma care, advanced shock, communication skills, peri-operative cardiac disorders, chest radiograph interpretation, nutrition)
- Simulated patient assessment
- Clinical decision making
- Legal, ethical, and communication issues
- Data analysis

HOW MUCH EFFORT IS REQUIRED?

- Familiarity with pre-course manual
- Passing a pre-course assessment (multiple choice questions)
- Full attendance during course
- Demonstration of knowledge and enthusiasm
- Completion of a final assessment based on a clinical scenario
