## MESSAGE FROM THE GUEST OF HONOUR

It is a great privilege to be invited to participate in the opening ceremony of the Annual Scientific Congress of the College of Surgeons, Academy of Medicine of Malaysia.

The theme of the Congress “First Do No Harm” reflects the values that are critically important to patients, medicine and doctors, and is as old as medicine itself. It is an excellent reminder to all of us as we work continuously to improve quality and safety in caring for our patients, as we absorb the amazing discoveries and new technologies into our practice.

I congratulate the College of Surgeons on the excellent academic programme in this Congress, and feel sure the delegates will enjoy and benefit from their attendance of this Congress. I wish the College of Surgeons well in their continuing endeavour to facilitate the continuing professional development of surgeons, and in setting high standards of medical practice in Malaysia.

### **Abu Bakar Suleiman**

Past Master, Academy of Medicine of Malaysia

Chairman, International Medical University

# MESSAGE FROM THE PRESIDENT OF THE COLLEGE OF SURGEONS, ACADEMY OF MEDICINE OF MALAYSIA

It gives me great pleasure to write this message for the Annual Scientific Congress of the College of Surgeons, Academy of Medicine of Malaysia. This year's meeting promises to be a memorable event. Not only it is hosted in the land of our Royal Patron, we also welcome our sister Royal Colleges of Surgeons from the UK to this joint meeting - the first time in our 46 year history. On top of that, we also have the College of Surgeons of Sri Lanka, our latest partner to join us in the scientific programme. The aptly chosen theme for this year's Congress is *Primum Non Nocere - first do no harm*. It is time that we all go back to basics.

Improvement in the quality of surgical care was the core principle behind the founding of the College, and quality improvement remains one of our primary missions today. Surgeons undoubtedly want to provide high-quality patient care, but the majority of these health care professionals are unlikely to directly participate in quality efforts in their practices or at their hospitals.

Another area that I admit we must improve on is communication. Communications might seem like the most straightforward of College activities, but in my opinion, it may have been the most difficult to accomplish. The College leadership is very sensitive to the concerns and desires of Fellows and Members, and while responsive to those issues, it has often been difficult to communicate the activities of the Council and the College to the ordinary members. Most of us connect to each other once a year during the Annual Congress. The younger members may be involved in some of the College's workshops throughout the year. In an effort to improve communication and inclusiveness, I am pleased to announce the formation of nine new chapters of the College. This move will ensure a more prominent participation of each interest group in the College. Congratulations to all for their role in this historic milestone.

Finally, I would like to thank my Council Members and everyone associated with the College for their tremendous support over the past one year. Special thanks to the Organising Committee of the Annual Congress and all individuals and sponsors who have put a tremendous amount of efforts to ensure this meeting is a success. I wish everyone a fruitful meeting and a memorable time in Ipoh, Perak.

**Hanafiah Harunarashid**

President

College of Surgeons

Academy of Medicine of Malaysia

# MESSAGE FROM THE PRESIDENT OF THE ROYAL COLLEGE OF SURGEONS OF EDINBURGH

I am delighted to welcome you to the 2018 Annual Scientific Congress of the College of Surgeons, Academy of Medicine of Malaysia. It is an enormous privilege to share in this event along with our Sister Colleges from the UK and Australasia.

The theme of this year's Conference 'Primum Non Nocere - First Do No Harm' resonates with everyone of us who is engaged in surgical practice. The Scientific Programme coupled with the Pre-Congress Workshops cover the cutting edge of current surgical practice from a worldwide viewpoint tailored to local need. The conference looks beyond surgical skills taking in new approaches to delivering clinical services as well as recognising the importance of human factors and non-technical skills in optimising patient safety and outcomes.

Associate Professor Dr Lim Kean Ghee, the Organising Chairperson, and his Committee are to be congratulated on drawing together such a comprehensive programme supported by national and international leaders in their field. I am sure that the next couple of days will provide many opportunities for interaction and reflection on how we can improve our own clinical practice.

I look forward to meeting you and wish you a most successful and enjoyable conference.

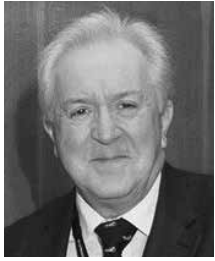

**Mike Lavelle-Jones**

President

Royal College of Surgeons of Edinburgh

# MESSAGE FROM THE PRESIDENT OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND

The Royal College of Surgeons of England is delighted to be joining the College of Surgeons, Academy of Medicine of Malaysia, for our inaugural joint symposium this year, and thank the College for inviting us to participate in this way. We view global knowledge exchange as one of the key strands of our College's work, and with our strong links in Malaysia, I am delighted to be leading our delegation. We look forward to addressing themes of leadership, training and outcomes - three areas of work where RCS England looks to make a real difference. These three areas have a direct impact on the safety and experiences of our patients, where we have had the opportunity to lead the debate at home. We look forward to present to you about schemes and research we have been taking forward, but just as importantly hearing about your work in these fields.

**Derek Alderson**

President

Royal College of Surgeons of England

# MESSAGE FROM THE PRESIDENT OF THE ROYAL COLLEGE OF PHYSICIANS AND SURGEONS OF GLASGOW

I am very pleased to send the greetings and good wishes of the Royal College of Physicians and Surgeons of Glasgow to all participants in this year's Annual Scientific Congress of the College of Surgeons, Academy of Medicine of Malaysia. It is always a great pleasure to engage with our colleagues in Malaysia.

Once again the Royal College of Physicians and Surgeons of Glasgow is pleased to support the College of Surgeons, Academy of Medicine of Malaysia this year and we look forward to participating and networking with our many Malaysian friends. In addition, we have the privilege of contributing a significant pre-congress workshop on Presentation Skills as well as a symposium in the main programme. We are also delighted to include world renowned neurosurgeon, Professor Sir Graham Teasdale, in our party - Graham will be giving one of the plenary lectures on the topic of the Glasgow Coma Scale which has revolutionised the management of head injury. The College meetings in Malaysia are always stimulating and enjoyable. A great deal of careful thought and planning is evident behind the theme and the programme. I believe Ipoh will be an amazing venue and, together with several visiting Faculty, we eagerly look forward to this year's event.

**David Galloway**

President

Royal College of Physicians and Surgeons of Glasgow

# MESSAGE FROM THE PRESIDENT OF THE COLLEGE OF SURGEONS OF SRI LANKA

It gives me immense pleasure to take part in the Annual Scientific Congress of College of Surgeons, Academy of Medicine of Malaysia 2018 with a team of senior faculty members of the College of Surgeons of Sri Lanka. The Congress this year themed “Primum Non Nocere” which is the maxim derives from one of the classical principles of medical ethics. “Non-maleficence” in surgical practice can be practically achieved only by a dedicated team of healthcare professionals which include not only surgeons but also other medical experts. Our colleagues in anaesthesiology, critical care medicine, and other experts in the allied health sciences should be an integral part of the team in this venture.

Current surgical practice involves the use of complex technical devices and therefore, formal training in the safe use of devices has become an essential component in the making of a surgeon who fits into the modern surgical theatre. In keeping with theme, several pre- and post-congress workshops detailed in the programme are aimed at grooming surgeons to use the advanced technology safely.

At the same time, the blue print of the main congress is enriched with topics covering a wide range of surgical specialties which focuses on safe and effective delivery of surgical care. Speakers from all corners of the globe are gathered here to contribute to the theme of safe surgery.

The College of Surgeons of Sri Lanka is proud to be a partner in this great academic event in the region. A strong academic link was established between CSSL and CSAMM last year, initiated by our immediate past president Professor Dr M D Lamawansa and Associate Professor Dato’ Dr Hanafiah Harunarashid, President of the College of Surgeons, Academy of Medicine of Malaysia. As a result, last year Professor Dr April Camilla Roslani graced the annual academic sessions in Kandy, Sri Lanka. This year we are here as partners and we would wish to continue this friendly collaboration for many years to come.

I wish the congress team and the members of CSAMM success in all their endeavors on behalf of the council and members of the College of Surgeons of Sri Lanka.

**Mahanama Gunasekara**

President

College of Surgeons of Sri Lanka

# MESSAGE FROM THE ORGANISING CHAIRPERSON OF THE ANNUAL SCIENTIFIC CONGRESS 2018

Welcome to Perak. It is the first time the College is holding its Annual Scientific Congress in Ipoh, the “Land of Tin” with the largest deposits of the metal in the world and Ipoh has much to offer.

2018 is an opportune time to come to Perak because the size of our Annual Congress is such that not many venues outside the Klang Valley can accommodate us. We are pleased to announce that having surveyed this Aman Jaya Convention Centre, we have found it suitable. As it is a new venue, we hope you will find the facilities and arrangements pleasant.

There is much to take note of in the ever changing world of surgery. New technology, especially the connectivity of the internet has the potential to change the way we do things. Refinements in how we plan and organise surgery for patients, such as ERAS and day care surgery, should stimulate us to relook at our practice. Sometimes, cases in the news involving doctors cause us to think not only of our science and skills but also of non-technical matters. We want our profession to progress incisively but also in a balanced way and the Organising Committee thought the age old motto of ‘first do no harm’ *Primum Non Nocere* is still the theme that befits the Congress.

For the College of Surgeons, Malaysia, our international connections have always been a much treasured asset. This year we very warmly welcome the Royal Colleges of Surgeons of Edinburgh, England and Glasgow, as well as the College of Surgeons of Sri Lanka as partners for our meeting. They have helped to bring us an outstanding faculty of surgeons who are experts in areas which are important today. The Organising Committee hopes our meeting will facilitate collaboration in all the areas we have similar interests in, training, organisation and even scientific. To all our overseas guests we wish you a very warm welcome and express our sincere thanks for putting our meeting on your priority list and coming here.

We hope, besides the surgical programme and fellowship which we believe you will find interesting, that Perak will have a wonderful place in your memory in the future. Ipoh city has its charm, but surrounding it, Perak has also much to offer. Pangkor Island has rustic beauty. The caves at Gua Tempurong have ancient majesty. Taiping has Lake Gardens and hills that are supremely serene. Kuala Kangsar has a river and palace that are magical. They are all within reach of a short journey of Ipoh and we hope that not only our overseas friends, but our local delegates will not forget the beautiful places in Perak. We are too busy inside hospital buildings too often. I hope this weekend and the days before and after offer everyone at the Congress a chance to experience not only something new and profound, for you, in surgery but also about Perak.

Our President, has family roots, time in school and working life here in Perak and if he is not too busy I think he would love to tell you about Perak. Same goes for me.

**Lim Kean Ghee**  
Chairperson, Organising Committee  
Annual Scientific Congress 2018

# 45<sup>TH</sup> A M ISMAIL ORATION

## Citation on Datuk Dr Noor Hisham Abdullah by Professor Dr April Camilla Roslani

Datuk Dr Noor Hisham Abdullah was born in Sepang, Selangor.

Datuk Dr Noor Hisham Abdullah read medicine at Universiti Kebangsaan Malaysia, graduating in 1988. Following initial rotations in Hospital Kuala Lumpur, he completed a Master of Surgery degree at the same university in 1994, and commenced his surgical career in Hospital Kuala Terengganu. His hunger to perform at a higher level led him to undertake a fellowship in breast and endocrine surgery in 1996. This journey landed him on the shores of Australia, specifically, at the Royal Adelaide and Queen Elizabeth

Hospitals, and subsequently, the Royal North Shore Hospital Sydney.

Upon his return, he was appointed head of the breast and endocrine surgical unit in Hospital Kuala Lumpur, and in 2002, headed the then newly-established surgical department in Hospital Putrajaya. His interest in clinical leadership was piqued by his experiences there, and, keen to improve his administrative skills, he pursued an Advanced Management Programme at the Oxford Business School in 2008.

Ascending to the position of Deputy Director-General of Health, he immediately set to transforming healthcare in Malaysia. His multi-faceted talents allowed him to excel at this, and it was no surprise when he was appointed Director-General in 2013. His administrative approach has focused on effective utilisation of talents across departments, ministries and sectors, dismantling the silo mentality. Ever the forward-thinker, he has championed succession planning for the leadership of the health service through a Talent Grooming programme for technical healthcare professionals. As President of the Malaysian Medical Council, he heads the highest authority for dealing with issues of professionalism amongst doctors and recognition of training programmes.

Nevertheless, he remains an innovative clinical surgeon, with a strong academic portfolio. He has published extensively, and recent research interests have included neck surgery under locoregional anaesthesia and the role of systems apps in the practice of medicine. He is firmly of the belief that social media platforms can be useful for professional support, academic discussions and research to further improve patient care. Recognizing the importance of research and strong data, he was instrumental in strengthening the platforms for clinical research in Malaysia, such as the National Medical Research Register, and supporting resources such as the Malaysian Cancer Registry. His academic contributions have been recognized by the Academy of Medicine of Malaysia, who made him Fellow in 2004, and he is currently Adjunct Professor at his alma mater. He has also received many awards and fellowships internationally, most recently, a Fellowship ad Hominem from the Royal College of Surgeons of Edinburgh in February of this year.

Datuk Dr Noor Hisham Abdullah's influence extends globally, as the representative for the Western Pacific Regional Office of the World Health Organisation, and as Chair of the Global Surgery Committee of the International Surgical Society. Interestingly and unusually he was also a Director of the Atomic Energy Licensing Body until the end of 2017 demonstrating his broad portfolio of ability.

Despite his many accolades, Datuk Dr Noor Hisham Abdullah remains a humble and approachable man. No matter how busy he is, he always manages to find the time to listen to problems and share his wisdom, regardless of who requests it. Indeed, the College of Surgeons counts itself among those who have benefitted from his generosity in this respect.

The A M Ismail Oration is named after the College of Surgeons, Academy of Medicine's founding President, Tan Sri Dr Abdul Majid. He was, himself, a colourful and extraordinary man, who shaped the early years of the surgical profession in Malaysia. It is fitting, therefore, that our A M Ismail Oration this year will be delivered by Datuk Dr Noor Hisham Abdullah.

## 2<sup>ND</sup> M BALASEGARAM TRAINER AWARD 2018

### Citation on Datu Dr Prabir Ranjan Sengupta by Dr Siow Sze Li

Datu Dr Prabir Ranjan Sengupta, fondly known as Mr Sen, is a retired Professor of Surgery from the University Malaysia Sarawak (UNIMAS) and formerly a senior Consultant General Surgeon for the Sarawak State.

Mr Sen was educated in St Paul's institution, Seremban, Negri Sembilan and Presidency College, Calcutta, India before going on to study medicine at the Calcutta Medical College and graduating in 1959. After graduation, he worked in several hospitals in Peninsular Malaysia before moving to Seremban Hospital in 1963 for two years where he was a medical officer and registrar to Dato' Dr M Balasegaram. He later moved to the UK to pursue his career and obtained his FRCS fellowship in 1967.

Mr Sen was the first surgeon from Peninsular Malaysia to work in Sarawak in the 1970s. It was a challenging period in the history of Sarawak Medical Services, an era of distrust and conflict among medical professionals from the west and east coupled with the intrigue of the European expatriates serving their final days in Sarawak. Mr Sen was not deterred by these difficulties and continued to work diligently, often single-handedly, allowing the quality and productivity of his work as the hallmark of his unquestionable value in the service. A lesser man would quit in despair.

A Fellow of the Royal College of Surgeons of England, the American College of Surgeons, the International College of Surgeons and the Academy of Medicine of Malaysia, Mr Sen is a highly regarded surgeon and a mentor to generations of surgeons in Sarawak.

During his tenure in the Sarawak General Hospital, Mr Sen was a passionate educator and trainer. He was instrumental in ensuring that the Sarawak General Hospital was recognised as a place for a one-year fellowship training by the Royal College of Surgeons of Edinburgh. He inculcated in his surgical trainees the good principles of surgery and the importance of patient care. His dedication was reflected by a surge in the number of surgeons completing the surgical fellowship in the 1980's. He is a beloved mentor to many of his trainees that helped shaped their careers. Many of these surgeons have gone on to become distinguished surgeons in their own right. One of his trainees included a past president of the College of Surgeons Malaysia.

He is a recipient of several State and Federal awards. Most notably, for his excellent service to the State of Sarawak, he was awarded Darjah Jasa Bakti Sarawak (DJBS) or Order of Meritorious Service to Sarawak which carries the title 'Datu'. In addition, a lecture series named after him was initiated by UNIMAS and the Malaysian Medical Association (MMA) Sarawak Branch, in recognition of his outstanding contribution to the medical profession.

He was the first president of the Malaysian Medical Association (MMA) Sarawak Branch (1981-1982). He had held several leadership roles in various social and non-profit organisations. He was the President of the Lions Club, Kuching (1982-1983), Chairman of the Sarawak Cancer Society (1983), Vice President of the National Cancer Society for about 20 years and President of the Indian Association, Kuching (1996-2000).

An avid reader and writer, Mr Sen has authored book chapters and books on the history of Indian doctors in Malaysia and the milestones of medical and healthcare services in Sarawak.

Mr Sen is a wonderful man with an altruistic attitude not only towards his patients but also to the society. He has donated generously to the building fund of the Academy of Medicine of Malaysia. He is a remarkable individual who has dedicated his professional life to the development of surgery in Sarawak. It is his endearing personality that makes him a trainer, a mentor and a friend to many generations of surgeons and doctors in Sarawak.

# PRE-CONGRESS WORKSHOP 1

## Basic Suturing Skills Course

**Date :** 7<sup>th</sup> - 8<sup>th</sup> May 2018 (Monday - Tuesday)

**Venue :** Advanced Surgical Skills Centre, Hospital Canselor Tuanku Muhriz, Universiti Kebangsaan Malaysia Medical Centre, Kuala Lumpur

### PROGRAMME HIGHLIGHTS

The Handling Of Surgical Instruments

Knotting Techniques

Techniques In Skin Suturing

Suturing & Anastomosis Technique

Abdominal Wall Closure Technique

# PRE-CONGRESS WORKSHOP 2

## Nutrition In Cancer Patients

**Date :** 10<sup>th</sup> May 2018 (Thursday)

**Time :** 0800 - 1700 hrs

**Venue :** Weil Hotel, Ipoh, Perak

**Participants :** Surgeons, Oncologists, Palliative Care Physician and all Health Care Professional dealing directly with cancer patients

Management of cancer patients is a challenging task to all medical practitioner. Due to complex nature of the disease, we often face with losing battle to bring the patient back into the best functional condition. A lot of them in particular facing problem with malnutrition either directly or indirectly because of the disease. Failure to address this issue has been proven to impair the patient's chance to regain their functional status.

In this workshop, we will highlight the importance of addressing the nutrition issue in cancer patient. Participants will be exposed with the recent studies and trials as well as guidelines regarding this topic.

### OBJECTIVES

1. To understand the pathophysiology of cancer cachexia.
2. To be familiar with the differences in managing malnutrition in surgical and cancer patient.
3. To be familiar with the various strategies to improve the nutritional status in cancer patients.

### BENEFITS OF ATTENDING

1. Lectures from distinguished faculties.
2. Exposures regarding the latest trials and guidelines.
3. Case discussion to facilitate the understanding of the topic.

### PROGRAMME

|             |   |
|-------------|---|
| 0800 - 0830 | Registration  |
| 0830 - 0845 | Welcome Address And Programme Overview  |
| 0845 - 0900 | Introduction To The Cancer Cachexia   |
| 0900 - 0940 | Cancer Cachexia: The Essential Differences Than The Other Malnourished Patients |
| 0940 - 1000 | Malnutrition And The Oncological Outcome  |
| 1000 - 1030 | Tea   |
| 1030 - 1100 | The Multimodal Strategy In Fighting Malnutrition In Cancer Patients             |
| 1100 - 1130 | Home Parenteral Nutrition In Cancer Patients: Is It An Option?                  |
| 1130 - 1200 | The Benefits And Pitfalls Of Tube Enteral Feeding In Cancer Patients Surgeon    |
| 1200 - 1230 | The Role And Approach Of Nutrition Therapy In Palliative Care                   |
| 1230 - 1415 | Lunch Talk And Lunch  |
| 1415 - 1615 | Case Discussion: Can We Do Better?  |
| 1615 - 1700 | Closing/Tea And Adjourn   |

# PRE-CONGRESS WORKSHOP 3

## Effective Communication And Public Speaking

**Date :** 10<sup>th</sup> May 2018 (Thursday)

**Time :** 0830 - 1600 hrs

**Venue :** Aman Jaya Convention Centre, Ipoh, Perak

This seminar will help you plan, communicate and illustrate your data or information in a memorable and engaging way. This is about making an impact and doing justice to the subject matter rather than leaving the audience frustrated and uninformed. You will learn about the personal qualities you need to be an effective public speaker as well as the necessary skills to create effective and powerful illustrations. There will be a chance to sharpen your skills before a friendly audience whose desire is to provide good quality constructive suggestions to help you sharpen these skills.

There are two parts to this programme:

**Part 1:** Lectures on basic presentation skills; covers background, preparation and delivery skills.

**Part 2:** Group workshop session. Each group will work on a subject to be presented to different audiences.

### PROGRAMME

|             |   |
|-------------|---|
| 0830 - 0845 | <b>BACKGROUND</b><br>Welcome And Opening Remarks<br><i>David Galloway</i>   |

| 1200 - 1300 | Lunch   |
| 1300 - 1600 | <b>Workshop Sessions: Group Discussion And Presentation</b><br>The participants will arrange into small groups.<br>Each group will be given a topic to prepare.<br>The objective is to prepare and deliver a 5 minute presentation appropriate to a particular target audience (specialists, GPs, public, news media outlet etc).<br>The exercise will involve content planning, construction of a Powerpoint slide presentation to include a media clip followed by formal delivery by one of the group.<br>There will be a constructive feedback session. Reviewing strengths and areas to consider improvement.<br>A prize will be awarded to the best presentation group. |

# PRE-CONGRESS WORKSHOP 4

## Science Of Tissue Management

**Date :** 10<sup>th</sup> May 2018 (Thursday)

**Time :** 0900 - 1745 hrs

**Convenor :** April Camilla Roslani

**SoTM :** "HOW DO WE CONNECT THE NEEDS OF TISSUE, TO THE SKILLS OF THE SURGEON, TO THE BENEFITS OF THE PATIENT"

**Venue :** Hospital Raja Permaisuri Bainun, Ipoh, Perak

This workshop is intended for surgical trainees and medical students and provides a platform with hands-on opportunity where sound understanding and in depth knowledge on device-tissue interaction and Science of Tissue Management (SoTM) can be obtained. It would involve sharing the latest information and innovations in Stapling, Energy Devices, Abdominal Wound Closure and Intra-Operative Bleeding Management and will be divided into a morning lecture session and an afternoon hands-on & lab demo session.

### LECTURE PROGRAMME

|             |   |
|-------------|---|
| 0830 - 0900 | Registration  |
| 0900 - 0910 | Welcome Address   |
| 0910 - 0920 | Introduction To Science Of Tissue Management (SoTM): Overview And History<br><i>April Camilla Roslani</i> |
| 0920 - 1005 | SoTM ENERGY<br><i>April Camilla Roslani</i>   |
| 1005 - 1015 | Energy Demonstration: Electrosurgery<br><i>April Camilla Roslani</i>                                      |
| 1015 - 1100 | SoTM Stapling<br><i>Khong Tak Loon</i>  |
| 1100 - 1115 | Q & A   |
| 1115 - 1200 | SoTM Bleeding Management<br><i>Vickneswaran</i>   |
| 1200 - 1245 | SoTM Abdominal Wall Closure<br><i>Zairul Azwan</i>  |
| 1245 - 1300 | Q & A   |
| 1300        | Lunch<br>End Of Lecture Session   |

# PRE-CONGRESS WORKSHOP 4

## HANDS-ON & LAB DEMONSTRATION

**Venue :** Hospital Raja Permaisuri Bainun, Ipoh, Perak

1400 - 1600

**Lab Stations:**

1. ENERGY: Harmonic (Ultrasound) And EnSeal (Advanced Bipolar)

*April Camilla Roslani*

2. Stapling: Linear Cutter And Echelon

*Khong Tak Loon*

3. Bleeding Management (Dry Lab): Fibrillar And SNoW

*Vickneswaran*

4. Abdominal Wound Closure: Loop PDS, Single Strand PDS With Self-Locking Knot And Stratafix

*Zairul Azwan*

1600 - 1615

Tea

1615 - 1715

Hands-On & Lab Demonstration Continues

1715

Closing & Group Photo

End Of Lab Demo Session
